“ I will miss Barbara very much. She was like the big sister I never had. We use to have some good talks. She was also like a second Mother to my son. She would help me keep him when I had to work late. I really liked being with Barbara because I could talk to her about anything. I loved her stories also. She told me what her life was like growing up and how things have changed so much. Both our families were in the military so you can imagine the things we both had done. I really miss her knitting and crocheting in front of me. She made the nicest things. The cat dollies are my favorite. I miss her more everyday that passes. I hope that when the time comes, her and I meet again, because I love her that much.
