

Mary Jane Stubblefield

January 28, 2013

"It is amazing you've done so much despite your handicap". I wanted to say to her, but before the words could leave my lips, my mind answered for her, "what handicap"? What I might consider a handicap, she may consider her motivation for success. For in truth, she has accomplished more than most of us dare dream to. She was recognized for her outstanding participation in Model Vision Project Outreach Project; a Bachelor in Science; Master of Science; Specialist in Education; and volunteered in many nursing homes in Pinellas County by reading to patients. She has inspired many. She gave back so much to the communities, even with her crippling disabilities. She was an amazing teacher and friend. She loved Elvis, in fact the only thing she was not able to do was dance. We shall miss you MJ. I hope you're enjoying that dance now.
